EXPERIENCE

Goldman Sachs

May 2026 – Jul 2026

Summer Analyst Intern

Bengaluru, Karnataka

- **Event-Triggered Automation:** Constructed an event-triggered automation pipeline in Python that replaced a manual daily variance narrative workflow (20 min/workflow) with a single human-reviewed pass.
- **Data Pipeline:** Established a deterministic data-preparation pipeline handling line-item grouping, materiality thresholds, and commentary joins, ensuring the LLM owned only prose while code guaranteed numeric integrity.
- **LLM Gateway Integration:** Formulated a detailed generation prompt integrated with the firm's internal LLM gateway, enforcing guardrails via structural validation and a bounded retry loop.
- **Evaluation Harness:** Devised a replay-based evaluation harness using LLM-as-judge scoring across three metrics (Completeness, Faithfulness, Correctness) to enable automated regression detection on prompt/model changes.
- **Real-Time Status Updates:** Deployed Server-Sent Events-based push notifications to sync narrative-generation status (in-flight/generated/failed) across concurrent reviewer sessions without polling.

PROJECTS

Trimium | Link Management and Analytics Platform

Dec 2025 – Jan 2026

Next.js, Express, MongoDB, Redis, TypeScript, AWS

[GitHub Repository](#)

- **Link Management & Analytics:** Architected a multi-tenant platform with RBAC workspaces (Admin/Member/Viewer), supporting bulk URL ingestion (500 URLs/batch) and event tracking across 7+ analytics dimensions (geo, referrer, device telemetry).
- **API Performance Optimization:** Optimized API response times by $\approx 70\%$ through strategic MongoDB compound indexing, cache-aside Redis caching, and asynchronous BullMQ worker queues.
- **Cryptographic Security:** Developed a hybrid rate-limiter issuing stateless Proof-of-Work (PoW) challenges on IP exhaustion, eliminating false positives for shared-IP networks while maintaining 100% API availability.
- **CI/CD Infrastructure:** Automated continuous delivery via a GitHub Actions pipeline with path-based change detection for selective monorepo deployments, zero-downtime PM2 reloads, and health-check auto-rollbacks.

Talkasauras | AI Powered Telegram Bot

Jan 2026 – Feb 2026

Telegraf, PostgreSQL, Ollama, Redis, Docker

[GitHub Repository](#)

- **Local LLM Inference:** Integrated Ollama for context-aware LLM inference via Telegraf, implementing dynamic prompt templating, multi-turn memory, and customizable persona styles.
- **Containerized Deployment:** Orchestrated a 5-container Docker architecture across isolated networks, ensuring reproducible deployments and seamless communication between bot and services.
- **Dual-Mode Chat Sessions:** Engineered dual-mode session management supporting ephemeral in-memory chats and persistent storage secured with AES-256 encryption at rest in PostgreSQL.
- **Admin Dashboard Bot:** Built an administrative bot interface enabling real-time system health monitoring, usage analytics, and asynchronous bulk message broadcasting.

EDUCATION

Dhirubhai Ambani University

Gandhinagar, Gujarat

Information and Communication Technology; CPI: 8.59

Aug 2023 – Present

- **Coursework:** OOP, Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C, C++, SQL

Frameworks & Libraries: Node.js, Express.js, BullMQ, Next.js, React.js, Tailwind CSS

Databases & ORM: PostgreSQL, MongoDB, Redis, Prisma, Mongoose

Cloud, DevOps & Tools: AWS (EC2, S3), Vercel, Render, CI/CD, Docker, Nginx, PM2, Git, Linux, Ollama

ACHIEVEMENTS

- Won 1st Prize in Winter of Code 7.0 (MSTC DAU) among 65+ participants.
- Solved 1850+ problems on LeetCode (MysteriousMortal) with a peak rating of 1819.
- Ranked 314 globally in CodeChef (devtrivedi03) Starters 169D.
- Ranked 427 in ICPC 2025 Amritapuri Regional (Preliminary Round).
